email	

## About the project

title
Describe your investigation. What were you trying to do, show, or find out?
Describe how you did it (procedure and materials).
Describe your results. What did you find out?

Bibliography (Include at least one scientific source. Google, Wikipedia, Encyclopedia, etc. do not count.)

Where did you do your project?

Who helped and/or supervised you?

What risks were involved?

What safety measures did you take?

Did you follow the rules & guidelines described in the regional fair guidebook for the intermediate division?

Yes       No

### **Parent/adult supervisor's approval**

- I reviewed with my student the rules and guidelines described in the science fair guidebook.
- I reviewed and approved my student's investigation plan prior to the start of the investigation.
- I discussed with my student the possible risks and safety concerns involved in his or her investigation.
